

MOTOMAN ArcSystem

2x MT1-250 S2D

- Designed for operator ease of use
- Unobstructed view of the robot cell
- Complete safety kit

Designed for the arc welding with separate work flows, e.g. objects that require different fixtures. The single arc welding robot and the two positioners on each side makes it a small and efficient system.

The ArcSystem is built to a global standard that delivers savings in both time and money. It is based on a modular system of standard components that can meet the requirements of the general and automotive industry using a minimum of floor space.

Equipment	
Possible robots	MA1900 , HP20D
Robot stand	H = 600 mm
Positioner	2x MT1-250S2D, max. payload 250 kg
Fume hood	L = 1700 mm
Safety kit	Safety fence, light guard, welding curtains, operator's panel
Welding equipment	<i>Not included. Must be quoted separately according to customer request.</i>
